

## Preview Opera Contemporary - Salone del Mobile Milano 2018 Milan – April 17-22, 2018

On the occasion of the Salone del Mobile 2018, **Opera Contemporary** launches - in exclusive preview - an elegant and contemporary flair that pervades every space of the house. A set of sophisticated proposals tells the brand's philosophy through fine details and configurations with a strong graphic presence.

For the night area, the brand launches a **contemporary bed** with an essential and refined style. The rigorous approach, albeit light, expands from the headboard - padded and enhanced by minimal seams that create calibrated geometric effects - to the linear bed frame of modern aesthetics. All supported by precious metal feet that express lightness and dynamism.

Taking pride of place in the living area, a sophisticated and welcoming **sofa** of moderate dimensions. Elegant seams adorn the outer backrest in pattern of rhombus and wrap the comfortable seat cushions resting on a metallic structure illuminated by the golden finish.

A refined series of accessories with a strong personality, the new side tables by Opera Contemporary feature a brass-finish structure combined with a high-quality marble top with beveled edges. A striking detail is the central foot that crosses the boundary imposed by the marble and becomes a decorative element of the top.

A collection of dramatic allure takes shape in the new seat of the brand. The slightly curved silhouette of the backrest, distinguished by considerable dimensions, is enhanced by a diamond pattern drafted by an elegant stitching. The clear profiles are also highlighted by a studded row that lends a touch of glamor to each piece.
